# MONITORING & ANALYSIS

To ensure your Digital Marketing is constantly growing and reaching new people, we need to monitor and analyze what works and what does not. We will check the results and Plan how best to do something again while making it fresh. This kind of data will not only be useful in social media outreach, but also in product development for your company, showing you what customers want and don't want. A big part of monitoring also has to do with interfacing with customers. We will respond to people's questions, comments, and suggestions when appropriate and in the most professional way possible. When customers can expect this level of engagement, they are more likely to stay customers and also help recruit their friends and family.

# REPORTS

We will provide daily, weekly, monthly, and quarterly analytics so you can see how your investment in Digital Marketing is paying off. Once we review results, we can make adjustments as necessary.
